

SAVE FUEL TOP TIPS

John's top ten tips for business drivers to save on fuel

Smooth acceleration: Build speed gradually and anticipate traffic ahead

Maintain steady speeds: Use cruise control where possible to reduce fuel burn

Cut out unnecessary idling: Switch off if stationary for more than a minute

Plan routes properly: Avoid congestion, roadworks and unnecessary mileage

Check tyre pressure regularly: Underinflated tyres increase fuel use

Reduce excess weight: Remove unused tools and equipment

Use the right gear at the right time: Change up early to keep revs low

Keep vehicles well-maintained: Regular servicing improves efficiency

Limit short journeys: Combine trips to avoid inefficient cold starts

Monitor driver behaviour: Use Fleetloc8 tracking systems to improve habits and reduce fuel waste
